

**AMENDMENTS TO THE SPECIFICATION**

Please replace the paragraph beginning at page 31, line 10 with the following rewritten paragraph:

--Brief Description of Drawings

Fig. 1 is an analysis result of the expression levels of pRB/cyclin E/p16/cyclin D1 in each human cancer cell line, by western blotting.

Fig. 2 is an analysis result of the expression levels of pRB/p16/cyclin E in the strains of ~~SY-1~~ BSY-1, H-526 and H-460 by immunohistostaining.

Fig. 3 is an analysis result of the expression levels of p16/cyclin E in a clinical specimen of endometrial cancer by immunohistostaining.

Fig. 4 is a graph showing correlations between the p16 mRNA level and T/C%, and between the p16 mRNA level and the expression level of the p16 protein.--
